Fire Safety Rules (Annuals & Residents)

In order to maintain a safe and accessible park environment, all residents and annual site occupants must abide by the park fire safety rules.

- All cabins and onsite caravans must have hardwired and working smoke detectors.
- All cabins and onsite caravans must have a fire extinguisher in working order.
- All cabins and onsite caravans must have a fire blanket.
- All fire pits are clear of leaves and debris and placed on top of pavers, bricks or cement.
- No fires on total fire bans days.
- No fires on days where management decides to ban fires.
- All fires to be extinguished when not being supervised.
- Cabins and onsite caravans must have a 1.2m clearance space around them to ensure adequate space to move freely around the structure.
- No wood stacks - all wood must be stored on front decks or in allocated wood storage areas dedicated by management (not on individual sites).
- All gutters to be cleaned and clear of leaves.
- All leaves on site to be cleared and placed in the appropriate bin or burn pile set by management.
- Lawns to be moved.
- BBQs to be checked and all perished or damaged gas lines to be replaced.
- In the event of extreme fire warnings, residents and annuals may be ordered to evacuate the park for their own safety and by recommendation of local authorities.

Please note, management reserves the right to enforce these rules at any time and rules can be changed and interpreted by management in the way they deem necessary for safety of the park and patrons.
